HTML | CSS | JavaScript | JQuery | JSON | AJAX | SQL | React.JS | Node.JS | Express.JS | Bootstrap | Materialize | Handlebars.JS | RESTful APIs | Git | Travis CI | Object-Relational Mapping | Heroku Deployment | Unit Testing | Photoshop

PROJECTS

Scavengers Assemble May 2019
[Site](#) | [Github](#)

A mobile-app for playing a digital scavenger hunt style game with the use of GPS coordinates and created clues/instructions and mysteries.

- Technologies: React.JS, MongoDB, Express.JS, Node.JS, Auth0, and Google Maps API.
- Key Role: React.JS frontend consumes a RESTful JSON API served by express backend, allowing the app to be single-page. Implements secure single sign on with auth0 and persistent sessions, improving UX and user satisfaction.

MYSQL Workout Bench April 2019
[Site](#) | [Github](#)

A location-based social search mobile- app that allows one to match with others based on the time and workout they choose.

- Technologies: Node.JS, Express.JS, JQuery, Handlebars, Passport.JS, MySQL and Sequelize npm.
- Key Role: Implemented complex, yet efficient, queries for matching users based across multiple parameters. Acted as scrum lead, efficiently distributing tasks, and ensuring 100% timely delivery

Scene March 2019
[Site](#) | [Github](#)

An application that facilitates easy access to views of nearby deals that are crowdsourced.

- Technologies: HTML/CSS, Bootstrap, JavaScript, jQuery, Firebase, Moment.JS, Google Maps API, and Foursquare API.
- Key Role: Consumes Hacker News' Firebase API, allowing for easy access to real-time updates.
